TASSO

Dear colleagues,

Our organization (The College of Romanian Veterinarians), has been designated by the Romanian authorities to manage the database for identification and registration of dogs with owners.

As we provide the management of the database for identification and registration of dogs with owners, we would be deeply grateful if you could communicate us the rate that your organization charge/dog identified and registered, in terms of database management.

We look forward to your response as soon as possible.

Yours sincerely,

President CRV

Assoc. Prof. Viorel Andronie DVM PhD
